
sensor plus brain noise (filled)
room field projected out (open)
adult D, sensor plus brain noise (+1.00 dB)
adult D, room field projected out (+0.86 dB)
A OPM advantage per head
B Change from the adult
scaled adult (size only)
School-age size (scaled adult), 52.5 cm
2-year size (scaled adult), 49.5 cm
infant template
24-month template, 49.5 cm
12-month template, 46.9 cm
Δ vertex-wise (the same vertices)
Δ parcel-matched (65–66 parcels)
0.0 0.5 1.0 1.5 2.0 2.5
−0.5 0.0 0.5 1.0 1.5
D, area-weighted median over cortical targets (dB)
Δ, paired change from the adult (dB)
C
Left, lateral
Left, medial
Right, medial
Right, lateral
24-month template: dense OPM array (151 sites) vs Neuromag (306 channels)
12-month template: dense OPM array (144 sites) vs Neuromag (306 channels)
Neuromag higher
D (dB)
OPM higher
−6 −4 −2 0 +2 +4 +6
medial wall (not colored)
within 4 mm of the inner skull (neither target nor background)
Fixed adult helmet, top contact; sensor plus brain noise; 10-nAm dipoles
